MANAGEMENT DISCUSSION AND ANALYSIS

India with nearly 162 Million Television Households (TVHH) is among the largest television distribution markets in the world. Community Antenna Television (CATV) services reach 97 Million (60% of TVHH) homes and is therefore the pre-eminent means of distributing television services in the country. Direct to Home (DTH) services follow with a penetration of around 32 Million TVHH.

CATV is well penetrated, particularly in urban regions. Media Partners Asia (MPA) 2013 estimates, that the total universe of TV Households in India will grow to 205 Million in 2020. Cable will continue to be a significant proportion of this universe and is expected to grow from 97 Million TVHH in 2012 to 106 Million TVHH in 2020. While the growth of the cable universe is modest the real opportunity lies in the implementation of mandatory Digital Addressable System (DAS) consequent to the enactment of the Cable Television Networks (Regulation) Amendment Act 2011. This will result in a more efficient monetization of the subscriber base and contribute to growth in subscription revenues. India commenced implementation of digitization (Digital Addressable Systems – DAS) from November 2012 in Phase I cities (Mumbai, Delhi & Kolkata) and soon thereafter followed up with the roll-out of DAS effective April 2013 in Phase II cities (38 cities with a population exceeding 1 Million). Phase III and IV are expected to be rolled-out in September, 2014 and December 2014 respectively, thus transforming the fortunes of the television distribution industry in the country.

Mandatory digitization of Cable TV networks will have far reaching consequences for the entire media industry. In addition to improving the economics of Cable TV companies i.e. the Multi System Operators (MSO) and broadcasters it will significantly enhance customer experience giving him/her the right of choice, empowering him to pick and choose the content he/she chooses to watch. More importantly the capacity of cable networks will be significantly enhanced enabling them to carry additional services such as High Definition (HD) channels, value added services such as Video on Demand (VoD), localized programming and most importantly Broadband services. All this will be achieved at Subscriber Acquisition Costs (SAC) that are significantly lower compared with other platforms such as DTH. The business which was hitherto B2B in its' character will transform into a B2C business.

Those players who adapt to this transformation will stand to gain considerably as their investments will be more effectively monetized realizing better returns for all stakeholders.

BUSINESS OVERVIEW

We are India's largest Multi System Operator (MSO). Along with our Joint Venture partners and subsidiaries we serve a universe that is expected to exceed 10.5 Million homes. Significantly, out of this universe, we directly serve nearly 640,000 primary subscribers where there is no intervening Local Cable Operators (LCO) thus allowing us to capture a better share of the economic value. Our footprint which subsumes 150 cities & towns and is amongst the widest in

the industry.

This footprint covers significant Hindi Speaking Markets (HSM) in the West, North and Central parts of India. In the process of rolling out in the Phase I DAS markets we have acquired new subscribers in cities such as Kolkata in the East and thereafter in Phase II expanded into cities such as Faridabad, Jabalpur and Agra in the North.

Among all MSOs, Hathway together with its' associates, cumulatively seeded the largest number of STBs reaching a count of almost 6.4 Million. It is anticipated that at the end of Phase II Hathway services will reach over 7.0 Million STBs making it by far the largest player at this stage. This positions the Company well to accelerate growth going into Phase III & IV in 2014.

Our Broadband services reach over 416,000 subscribers out of a home passed universe of about 1.5 Million. It is the largest broadband provider among all MSOs in the country. This service is available across 19 cities giving it pan India presence.

Our DAS roll-out is now supported by 20 Digital Head-ends and more than 16,000 kilometers of HFC network. We are also in the process of upgrading our Broadband services with a state-of-the-art Docsis 3 platform. We anticipate that this will significantly impact customer experience and will help to make us India's premier operator in the Broadband space.

We continue to receive commendations from industry having been awarded the "Best cable operator of the year" by Indian Telly Awards several times.

OUR STRATEGY

CATV

With the roll-out of DAS we expect our business model to change significantly transitioning our strategy from width to depth.

Our early focus has been on digitally enabling our universe of subscribers in the Phase I and Phase II cities that we serve. This has involved partnering with our Local Cable Operators / Distributors in adequately seeding Set Top Boxes (STBs), establishing back end infrastructure such as Digital Head-ends, Subscriber Management Systems (SMS), Conditional Access Systems (CAS) and Customer Contact Centers that are commensurate with the scaling up of operations. We have achieved near 100% seeding of STBs in the areas that we serve. We have deployed quality CAS from NDS and Cisco. We have also simultaneously strengthened back-end infrastructure by deploying state-of-the-art Ericsson head-ends in key markets. The compression technologies deployed through these head-ends allows us to free up huge capacity that can be alternatively deployed for additional Standard Definition, High Definition and Broadband services. We have also partnered with an outsourced customer contact center for better provision of services.

With the completion of Phases I and II of DAS we have achieved coverage across a wide geography. This presence gives us either the number one or two positions in terms of

market share in most of the markets we serve. Most of the cities are significant Hindi Speaking Markets (HSM). This positions us well in our negotiations of content supply terms with broadcasters.

We have expanded into new cities such as Kolkata, Jabalpur, Agra and Faridabad. We also expect to add to our universe in cities such as Hyderabad and Bangalore. This addition to our universe has resulted in an expansion in our total universe from 8.8 Million subscribers to over 10.5 Million subscribers. It is pertinent to note that a bulk of our universe derives from Phase I and II towns which are expected to be higher Average Rate per Unit (ARPU) markets and more likely to adopt Value Added Service offerings.

We also use the capacity of our networks to deliver a wider variety (20+) of HD channels compared with competing platforms.

In the next phase of our growth we intend to focus on providing greater depth to our service offerings – this is expected to drive growth in ARPU over the next few years. Keeping this objective in view we anticipate launch of several Value Added Services, over the next few years, among which the following will be our immediate focus –

- Innovative channel packaging to aid up selling services to subscribers
- Video on Demand
- Local Content
- HD - PVRs

BROADBAND BUSINESS

We are the country's largest cable broadband service provider. We intend to build on this base of over 416,000 subscribers (Homes Passed : 1.5 Million). We recognize that a bundled dual play offering that includes both CATV and Broadband to our subscribers makes effective use of our Digital infrastructure. Apart from being a value add it will dissuade customers from churning as competing platforms (such as DTH) cannot match our bundled offering.

We are in the process of upgrading our broadband infrastructure to the Docsis 3 standard which allows us to offer higher access speeds. This process will commence first in markets with high ARPU potential and gradually roll-out thereafter nationwide. We will also offer innovative bundled price and product packages (for instance, including CPE for home WiFi enablement for high bandwidth subscribers).

We expect to rapidly grow our homes passed over the next few years extending our broadband reach into markets that have been digitized consequent to the DAS mandate.

REGULATION

Our business is subject to regulation by the Telecom Regulatory Authority of India ("TRAI"), the Ministry of Information and Broadcasting ("MIB") and Department of Telecommunication ("DOT").

PERFORMANCE REVIEW

Standalone Operating Revenue for the company for the year ended 31st March 2013 stood at Rs. 668 crores which represents a growth of 26% over the previous year. EBITDA

was at Rs. 182 Crores (Previous Year Rs. 101 Crores) and PAT for the year stood at a profit of Rs. 3 Crores (Previous Year loss of Rs. 53 Crores).

Consolidated Operating Revenue for the Company stood at Rs. 1148 Crores (Previous Year Rs. 1029 Crores) up by 12% and EBITDA at Rs. 290 Crores (PY Rs. 184 Crores) up by 57%. Consolidated PAT stood at a profit of Rs 16 Crores (Previous Year loss of Rs. 49 Crores).

RISKS AND CONCERNS

MARKET RISK

We derive a significant portion of our subscription revenue from carriage and placement fees. In the event of any decline in the growth of the broadcasting business in India or if new channels are not introduced, our revenues may decrease. Further, revenues from placement fees depend upon the availability of frequencies. If the frequencies requested by a broadcaster have already been provided to another, we may not be able to provide such broadcaster with the same frequency, thereby adversely affecting our business and results of operations.

Our relationships with existing LCOs — To maintain our secondary subscriber base, it is critical to maintain a healthy relationship with our LCOs in order to avoid such LCOs from considering alternatives to our cable television services.

Competition — Our cable television services business faces competition from national cable television service providers as well as providers of television services through alternative technology platforms, such as DTH satellite television and IPTV. Our key competition for broadband Internet access service is ADSL technology, provided by companies such as BSNL/MTNL, Airtel, Tata Communication and Reliance.

FINANCING RISK

As at March 31, 2013, our outstanding loans from banks and financial institutions of Rs. 568 Crores, was subject to floating interest rates. Further, outstanding payables to banks and creditors for capital expenditure aggregated to Rs 421 Crores and subject to fluctuations in foreign currency rates. As a consequence, our operations may be materially affected by fluctuations in interest and foreign currency rates. While we partly hedge our foreign currency risks through forward cover contracts, we have not entered into any hedging transactions with respect to interest rates.

HUMAN RESOURCES

As we transition from a B2B to B2C business model we recognize that the quality of our human resources will be key to enhancing our customer experience. To this end we have hired talent from the telecommunications and media space to strengthen our leadership. We are also in the process of restructuring and retraining our human resources to make the organization more customers facing.

The appellate authority has confirmed the demand raised by the Assessing officer. For settlement of dispute of such demand company has filed an application before the Hon'ble Settlement Authority under the MP VAT Act and agreed to pay Rs.17,471,000, the liability as calculated by the company. The application has been accepted by the settlement authority which is pending for adjudication. Simultaneously the company has also filed an application before the Indore Bench of the Hon'ble High Court of Madhya Pradesh for granting the stay to deposit the demand raised by the Commercial Tax Department and as per the direction of the Hon'ble High Court of the Madhya Pradesh the company has deposited balance of undisputed tax liability of Rs.7,771,000 and got the stay order for the balance demand. Accordingly, during the year the company has charged such entertainment tax of Rs.20,499,000 for financial year 2011-12 including Rs.17,471,000 for the period ended February 27, 2012.

As per the view of the Management of the HB MPL, since the levy of entertainment tax on cable operators under the 2011 Act is nothing but a tax on service and not a tax on entertainment and the provision of Cable TV being characterized as a service only the parliament i.e. the Central Government has the power to tax this service and not the State Government, Entertainment Tax is not applicable on the business of the HB MPL, however HB MPL is making such entertainment tax under protest without prejudices to the Companies rights/contentions.

The matters stated against (b),(d),(e),(f),(g),(h) and (i) above, are pending and based on the outcome of the respective petitions, liability may extend to period beyond notice period. The contingent liability in respect of claims is considered as part of Claims against Company not acknowledged as debts.
